DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-3, 35, 37 and 38**, drawn to A method of crediting a mobile radio apparatus account using: a mobile radio apparatus having a radio communication circuit and a display capable of displaying an image including a graphical representation of data, and a retail system having a reader capable of reading graphically represented data displayed on said display of said mobile radio apparatus;, classified in class 705, subclass 28.
 - II. **Claims 4-34, and 36**, drawn to a payment system for crediting a mobile radio apparatus account comprising: transaction control system storing account database records of mobile radio apparatus accounts, each account database record, including an amount of credit, classified in class 705, and subclass 44.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a transaction control system storing account database records of mobile radio apparatus accounts, each account database record. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Anthony Smith on December 31, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
